

DIARY NOTES

Executive Director-Comptroller

6 August 1965

1. Dick Helms and I discussed the report of the Ad Hoc Panel of the Scientific Advisory Board which convened to consider NPIC and the NPIC situation in general. I committed myself to have a paper for him by Monday, 9 August, which would contain the gist of what he should say to Ray Cline about a concerted and aggressive attack on the NPIC problem.

2. Bob Bannerman discussed with me a paper which the FE Division had submitted concerning special treatment for employees assigned to Saigon and their dependants. The gist of it is that we would continue to allow families to go overseas (we might send employees or other posts with their families and then send the employee on TDY to Saigon), we would ship automobiles for the families, etc. This is really merely an extension of what we are already doing for Saigon and I see no reason why it requires special approval. Bob signed the paper, which should go far toward assisting FE Division in staffing the Saigon station.
